## Silicone Airway Nasal Splints Specification Sheet

### Material Specification

Product Component	Specification
Splint	100% Medical Grade Silicon
Pouch Packaging	Tyvek/Film
Outer Box/Carton Packaging	500 Micron White Boxboard

### Intended Use

Airway Splints are intended for use after reconstructive nasal and septal surgery.

### Sterilisation

Products are sterilised by Ethylene Oxide (EO) according to a validated cycle and the requirements of BS EN ISO 11135-1(current).

### Instructions for Use

The instructions for use and suggested surgical technique are supplied in the form of a multi-lingual leaflet with instructions given in diagram form where appropriate. The international symbols used on the packaging are explained in each language. A leaflet is supplied with each product.

### Conformity to the European Directives

The NETWORK family of Internal Nasal Splints are invasive devices with respect to body orifices for short term use in the nasal cavity supplied and are classified as Class I STERILE devices according to Annex IX, Rule 5, of the Medical Devices Directive 93/42/EEC as amended by 2007/47/EC.
