

CARBON REDUCTION PLAN

Supplier Name Network Medical Products Limited

Publication Date 18th September 2026

Commitment to Achieving Net Zero

Network Medical Products Limited is committed to achieving Net Zero emissions by 2040

Baseline Emissions Footprint

Baseline Year: 1 st January 2025 – 31 st December 2025		
Additional Details relating to the Baseline Emissions calculations.		
A professional carbon accountancy organisation was used to help create our baseline. The calculation uses the 2025 emission factors developed by the Department for Environment, Food and Rural Affairs (DEFRA) and the Department for Business, Environment & Industrial Strategy (BEIS) for reporting emissions. In the baseline assessment, Network Medical have captured emissions for Scope 1, Scope 2, Category 1 – Purchased goods and services, Category 2 – Capital goods, Category 3 – Fuel- and energy related activities (not included in Scope 1 or Scope 2), Category 4 - Upstream transportation and distribution, Category 5 - Waste generated in operations, Category 6- Business travel (not included in Scope 1 or Scope 2), and Category 7 – Employee commuting		
Baseline year emissions: Market-based emissions.		
EMISSIONS	TOTAL (tCO ₂ e)	
Scope 1	On-site fuel use	0.00 tCO ₂ e
	Fugitive emissions (inc. refrigerants gases and AC)	0.00 tCO ₂ e
Scope 2	On-site consumption of purchased electricity, heat steam and cooling	0.00 tCO ₂ e

Scope 3 (Included Sources)	Scope 3.1 Purchased goods and services	2,062.84 tCO₂e
	Scope 3.2 Capital Goods	39.33 tCO₂e
	Scope 3.3 Fuel- and energy related activities (not included in Scope 1 or Scope 2)	0.00 tCO₂e
	Scope 3.4 Upstream transportation and distribution	4304.55 tCO₂e
	Scope 3.5 Waste generated in operation	29.94 tCO₂e
	Scope 3.6 Business travel (not included in Scope 1 or 2)	10.32 tCO₂e
	Scope 3.7 Employee commuting	136.88 tCO₂e
Total Emissions	6,583.86 tCO₂e	

Current Emissions Reporting

Reporting Year: 1 st January 2025 – 31 st December 2025 (Market-based emissions)		
EMISSIONS	TOTAL (tCO ₂ e)	
Scope 1	On-site fuel use	0.00 tCO ₂ e
	Fugitive emissions (inc. refrigerants gases and AC)	0.00 tCO ₂ e
Scope 2	On-site consumption of purchased electricity, heat steam and cooling	16.65 tCO ₂ e
Scope 3 (Included Sources)	Scope 3.1 Purchased goods and services	2,062.84 tCO ₂ e
	Scope 3.2 Capital Goods	3.33 tCO ₂ e
	Scope 3.3 Fuel- and energy related activities (not included in Scope 1 or Scope 2)	0.00 tCO ₂ e
	Scope 3.4 Upstream transportation and distribution	4,304.55 tCO ₂ e
	Scope 3.5 Waste generated in operation	29.94 tCO ₂ e
	Scope 3.6 Business travel (not included in Scope 1 or 2)	10.32 tCO ₂ e
	Scope 3.7 Employee commuting	136.88 tCO ₂ e
Total Emissions	6,583.86 tCO ₂ e	

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We commit to reducing Scope 1 and Scope 2 emissions by at least 5% per year, on average, from our baseline year through to 2030, supported by energy efficiency, fuel-switching measures and continued use of Zero Carbon Electricity. Scope 3 emissions remain an area of active development; however, recent strategic changes, including two further medical company acquisitions by our parent company, Innovia Medical have materially altered our value chain and created significant uncertainty around future Scope 3 boundaries and volumes. Accordingly, while we remain committed to measuring and engaging on Scope 3 in line with best practice, we are not setting a fixed absolute Scope 3 reduction target at this time and will instead focus on improving data quality and supplier engagement before defining quantitative Scope 3 targets in future iterations of this Carbon Reduction Plan.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following measures and initiatives are in-progress, planned, or under consideration, to support the achievement of our Net Zero target:

- Installation of Solar Panels to generate clean electricity, displacing fossil fuels, reducing carbon emissions, and accelerating progress toward net-zero climate goals.
- Energy efficiency improvements in both offices and manufacturing areas, to reduce scope 1 and scope 2 emissions.
- Decarbonization of heating, to eliminate all scope 1 emissions associated with heating.
- Secure renewable energy supply from an off-site energy provider, to reduce or eliminate scope 2 emissions.
- Supplier collaboration activities to identify opportunities to reduce scope 3 category 4 emissions, particularly those created by sea or air transportation.
- Introduce a business travel policy to prioritize sustainable transportation options, reducing scope 3 category 6 emissions.
- Identify and implement opportunities to improve data quality, helping ensure emissions reduction efforts remain focused where there is the biggest impact.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
